about me

A passionate and well-rounded Agile developer, with strong problem-solving skills, who is able to convert complex problems into smaller and easier tasks. A good team player but also a team leader if needed, who is able to listen and compare ideas with others to drive teams to better solutions.

A natural explorer and a traveller who have met many different cultures which opened his mind while teaching values such as respect, adaptability and integrity.

experience

Feb 2016 – Aug 2016

Python Developer

Tangent Snowball – London, UK

This role encompassed the development of SaaS platforms, APIs and microservices. The technology stack was made of Python, Django, JavaScript, HTML, MySQL, PostgreSQL, Docker and Git.
